

Today the 5 year survival rate from prostate cancer is over 95%... with your help we can ease its burden on men and their families!

How Your Gift Helps....

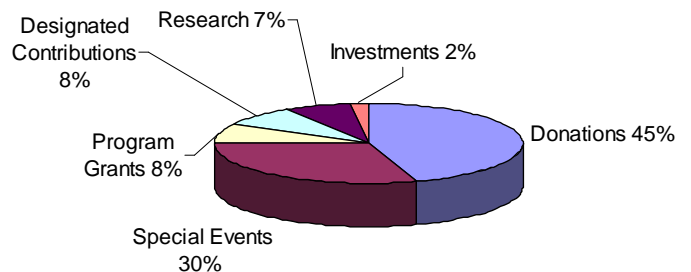

Every dollar goes a long way to support programming. Donors like you provide the bridge between the essentials the health care system delivers and the specialized programs the Centre delivers. We offer these services on a very small budget of close to \$350,000.

Stewardship of your dollars is of paramount importance to us and we very carefully determine the services the Centre will provide. Donations ensure ongoing services, as well as the ability to add progressive, new programs for prostate cancer patients and their families.

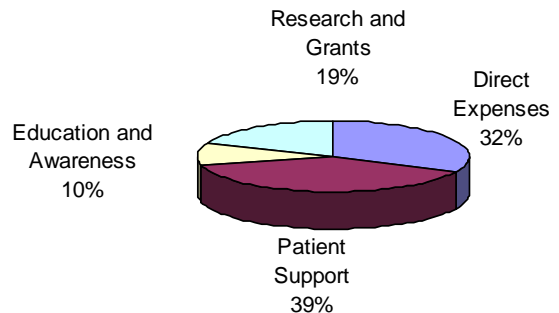

From research to helping reduce the level of stress, providing continued support and creating disease awareness, every element that makes our programs so successful requires your donation to make it happen.

As a client recently said, ***"I came through the door and found this oasis of support from strangers who cared that I had the right information and followed up by phone to make sure we were OK. They made an enormous difference through answering our questions and seeing us through our treatment decisions."***
